Please note the excerpt:

- **'Sgt. Fidle seems to take lead on the perf issues and has a strong dislike for Prob Jack as he does not own up to his errors'**

Apart from being Sergeant Flindall's next-door neighbor (and shortly after the conference call even a subordinate of Sergeant Flindall) Constable Richard Nie was privy to Sergeant Flindall's strong dislike of me during the conference call. So much for the **'fresh start with a clean slate'** that I was advised of and was stupid to believe in.
